

GARNET

Do you want one harness for the crags, the gym or the mountains, simply for all your vertical activities? Then there's GARNET, a universal three-buckle climbing harness that you can wear from morning to evening and even at night.

DESCRIPTION

Well thought-out design of the waist belt and leg loops, which uses 2 webbings running along the sides of the padding, distributes the load efficiently and ensures greater comfort when sitting or hanging in the harness.

Durable belay loop has a width of 12 mm and a strength of 15 kN.

Reinforced tie-in points are a matter of course.

EVA foam padding is covered on the inner side with a porous 3D fabric and on the upper side with a breathable fabric with high abrasion resistance.

In the back there is a haul loop with a load capacity of 10 kg.

Harness also offers 2 slots for auxiliary plastic PORTER carabiners, into which you can clip additional material.

For quickdraws and other equipment, you have 4 shaped gear loops with textile braiding and a load capacity of 5 kg.

You can easily adjust the harness using 3 patented stainless steel Rock&Lock buckles.

KEY FEATURES

- thanks to Rock&Lock buckles on the leg loops you can put it on without having to take your skis or crampons off
- you can choose from two colour variants

STANDARDS

CE 1019
EN 12277, type C

FEATURES

TECHNICAL DATA

Power distribution at the waist belt and leg loops:

COMPARISON

GARNET C5084 vs. GARNET C5073

- Different construction - 2 equally wide webbings running along the edges of the padding distribute force more efficiently. Especially on the leg loops, where originally there was one wider strap in the middle, the current design is more comfortable.
- Lower weight, while increased seating comfort and more durable fabric.
- The new generation does not have the BMI adjustment system on the waist belt.
- 2 elastic bands on the waist belt allow a better attachment of the free end of the tightening strap.

GARNET C5073
